

SOFTWARE SOLUTIONS ARCHITECT AND DEVELOPER

“To do great work, you must love what you do - Steve jobs. ”

Because of my passion in software development, I have already been in Industry for three years. Within those years, I have a couple of wins by developing software applications that transform and innovate businesses.

One of the solutions that I created is a Property Management software which I work closely with their Director. My task here is to develop Intuitive UX and Scalable software for the project. With the help of this software they were able to expand their operations from 95 to 453 condo units.

My evaluated experiences Have gained me knowledge and skills in Business Analysis, Research and development, Project Management and also some areas in Operations.

I also have expertise in UX/UI and Software architecture design, Mobile application development, API'S and Creating libraries etc, Having these sets of skills enables me to create

and design long-lasting, efficient solutions for my clients.

If you're a company that seeks to be better everyday, let me contribute something to that growth, looking forward to creating remarkable things with you.

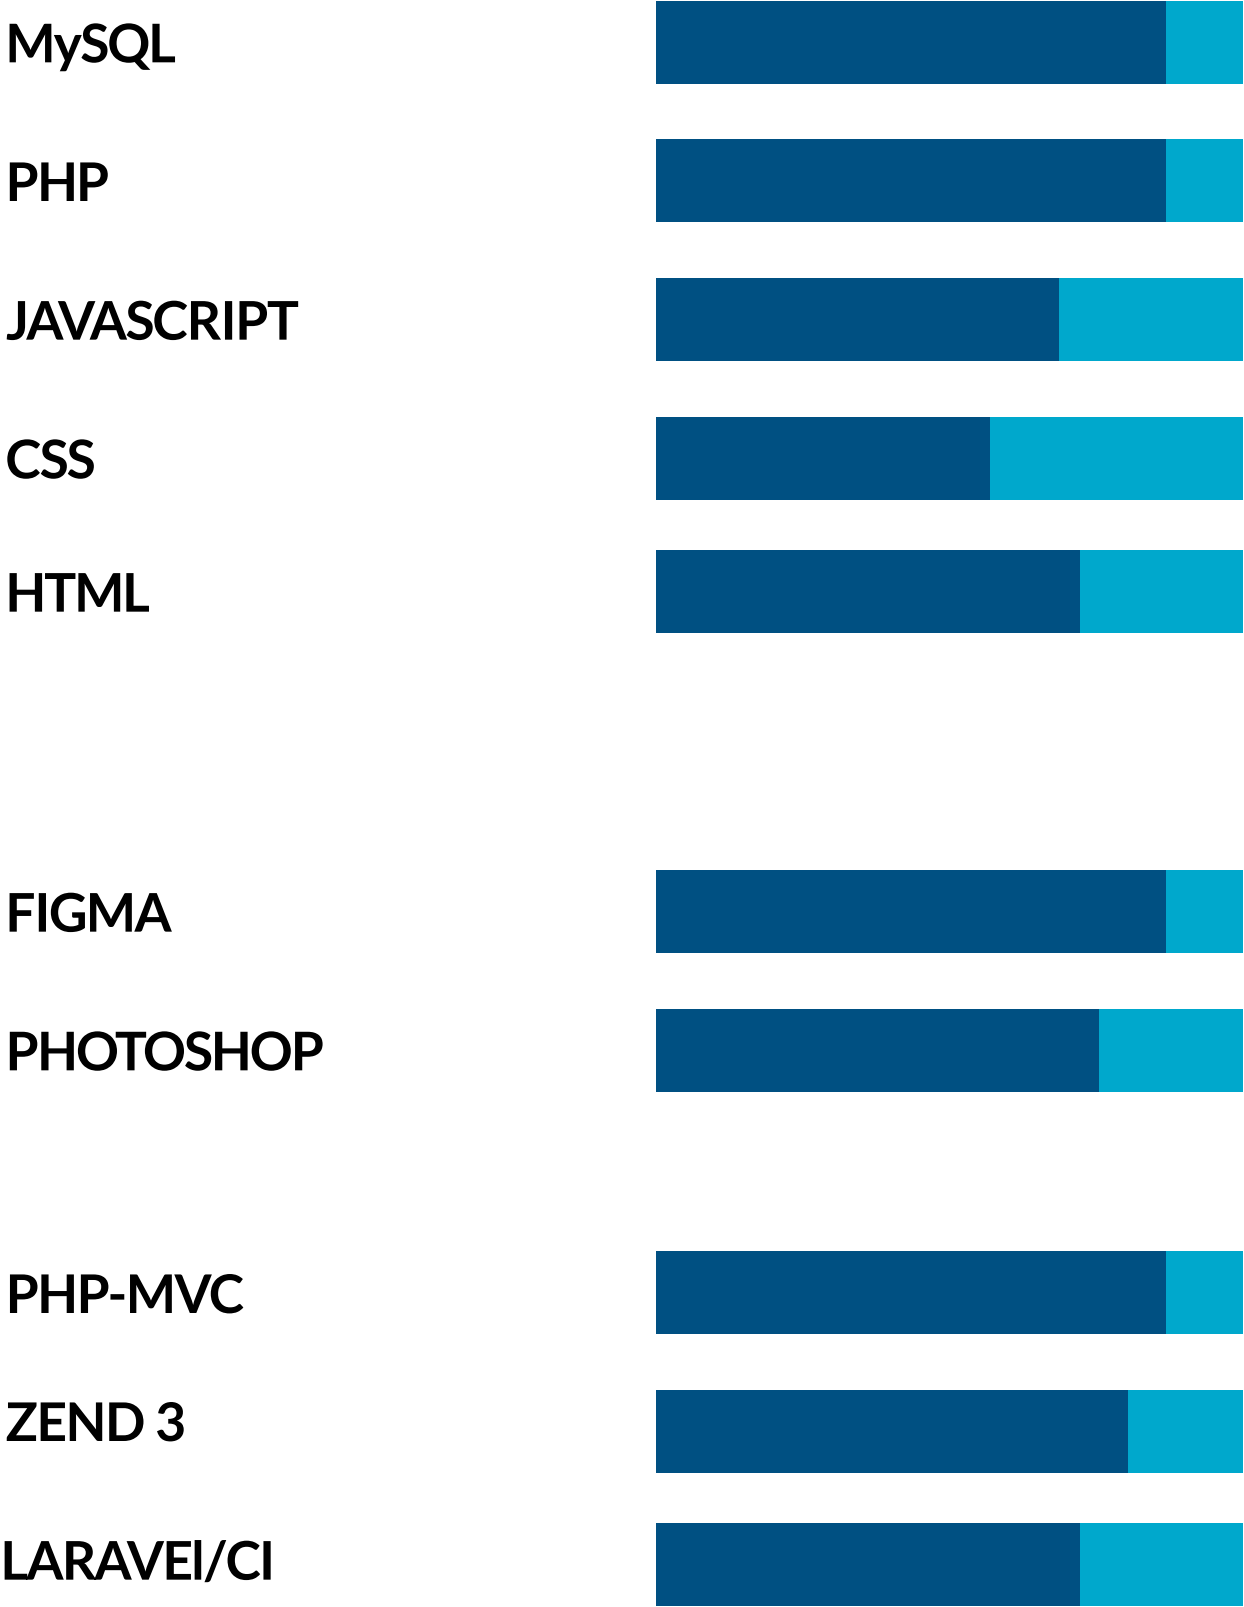

MARK GONZALES

SOFTWARE SOLUTION ARCHITECT/DEVELOPER

Aside from Software Development I also have experience and knowledge on Digital Marketing and Graphic Designs.

EXPERIENCE

**SALES REPRESENTATIVE
BPO COMPANY**
(VXI Global Solutions, Incorporated)
2018 - 2018
My work here is to make sales and resolve customer complaints about billing and technical supports.

**SOFTWARE DEVELOPER
MLM-COMPANY
(SOLUTIONS PROVIDER)**
(Private Company)
2019 - Active
My role is to develop mlm software with ecommerce extension from scratch with our veryown mvc architecture using LAMP stack.

**SOFTWARE DEVELOPER
(SOLUTIONS PROVIDER)**
(SSB Group of Companies)
2019 - Active
SSB Group of Companies desires to make their staffs works easier by giving them a portal where they will log all their daily transactions , we also including invoicing and billing , reconcillation and many more. The system has been running since 2019

SOFTWARE ENGINEER
(Private Company)
2022 - Active
My main task to the company is to maintain one of the largest account in the company a custom software application that deals with automating and tracking down crash reports, I also develop a tool for that software to enable the operations to increase the quality of their reports. Also I help the other team to design UX solution on of their SAAS project.

EDUCATION

HIGH-SCHOOL
(Bagong Silangan High School)
2012 - 2016

College
(STI-College Quezon Avenue)
2016 - 2018

BACK-END AND API EXPERIENCE

MLM-INCENTIVES ENGINE

I have experience in creating MLM Incentives engine where it computes complex computation for distributing commissions to each member of the organization , I also design and implemented the organizational chart which help people to view their org-hierarchy

PHP

E-WALLET

We have developed also a mini e-wallet software which is capable of doing basic task of an-ewallet applications users can send and deposit cash to the system, the tricky part of this application is connecting it to our mlm software application and to the payroll application , **we have successfully built it by creating PHP SDK which allows the systems to process request efficiently until now the company is still leveraging the application that we have developed for 2years++**

PHP

JS

PROPERTY MANAGEMENT

Property management software is just basically a keying application but if the project owner wants to run the entire business operations in the system it will become highly complicated which happens to us , but moving the operations digitaly helped the company grow their business to 500% previously they are only handling 93 units but know they are serving 567++ units and undreds of unit-owners. in that system we included billing and invoicing and employee and contractor performance.

PHP

JS

CRASH MANAGEMENT SOFTWARE

Currently I am working with one of the most popular and used crash management software in the US, it deals with tracking and automation of police reports. its a big software application with different departments working under-it.

PHP

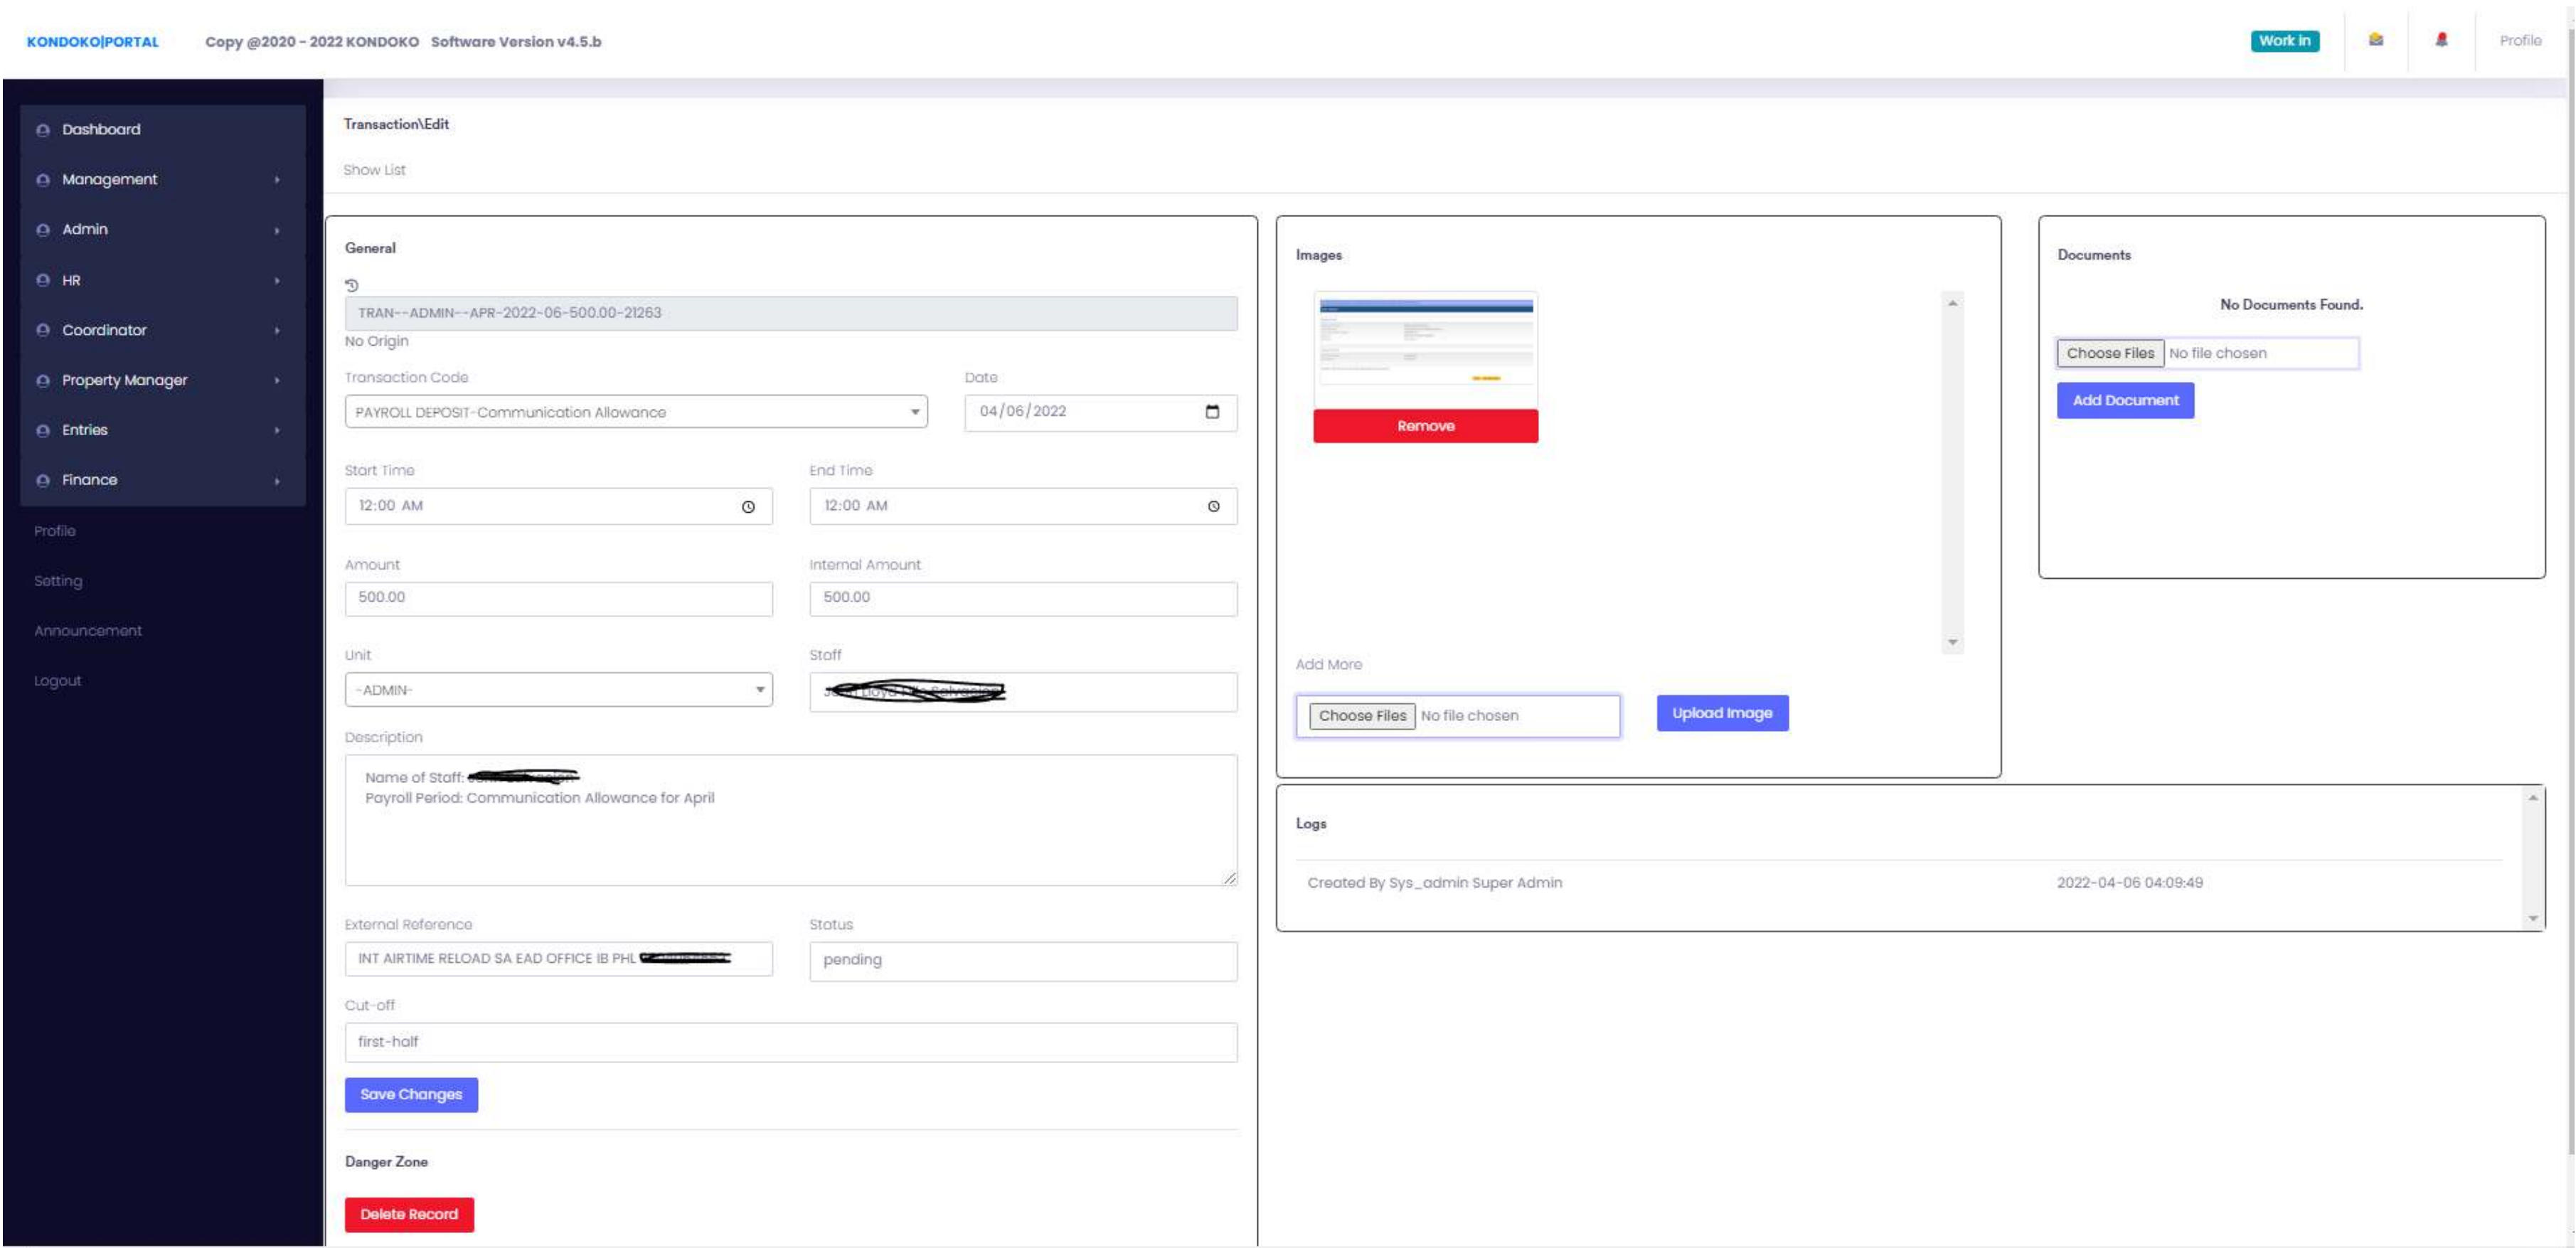

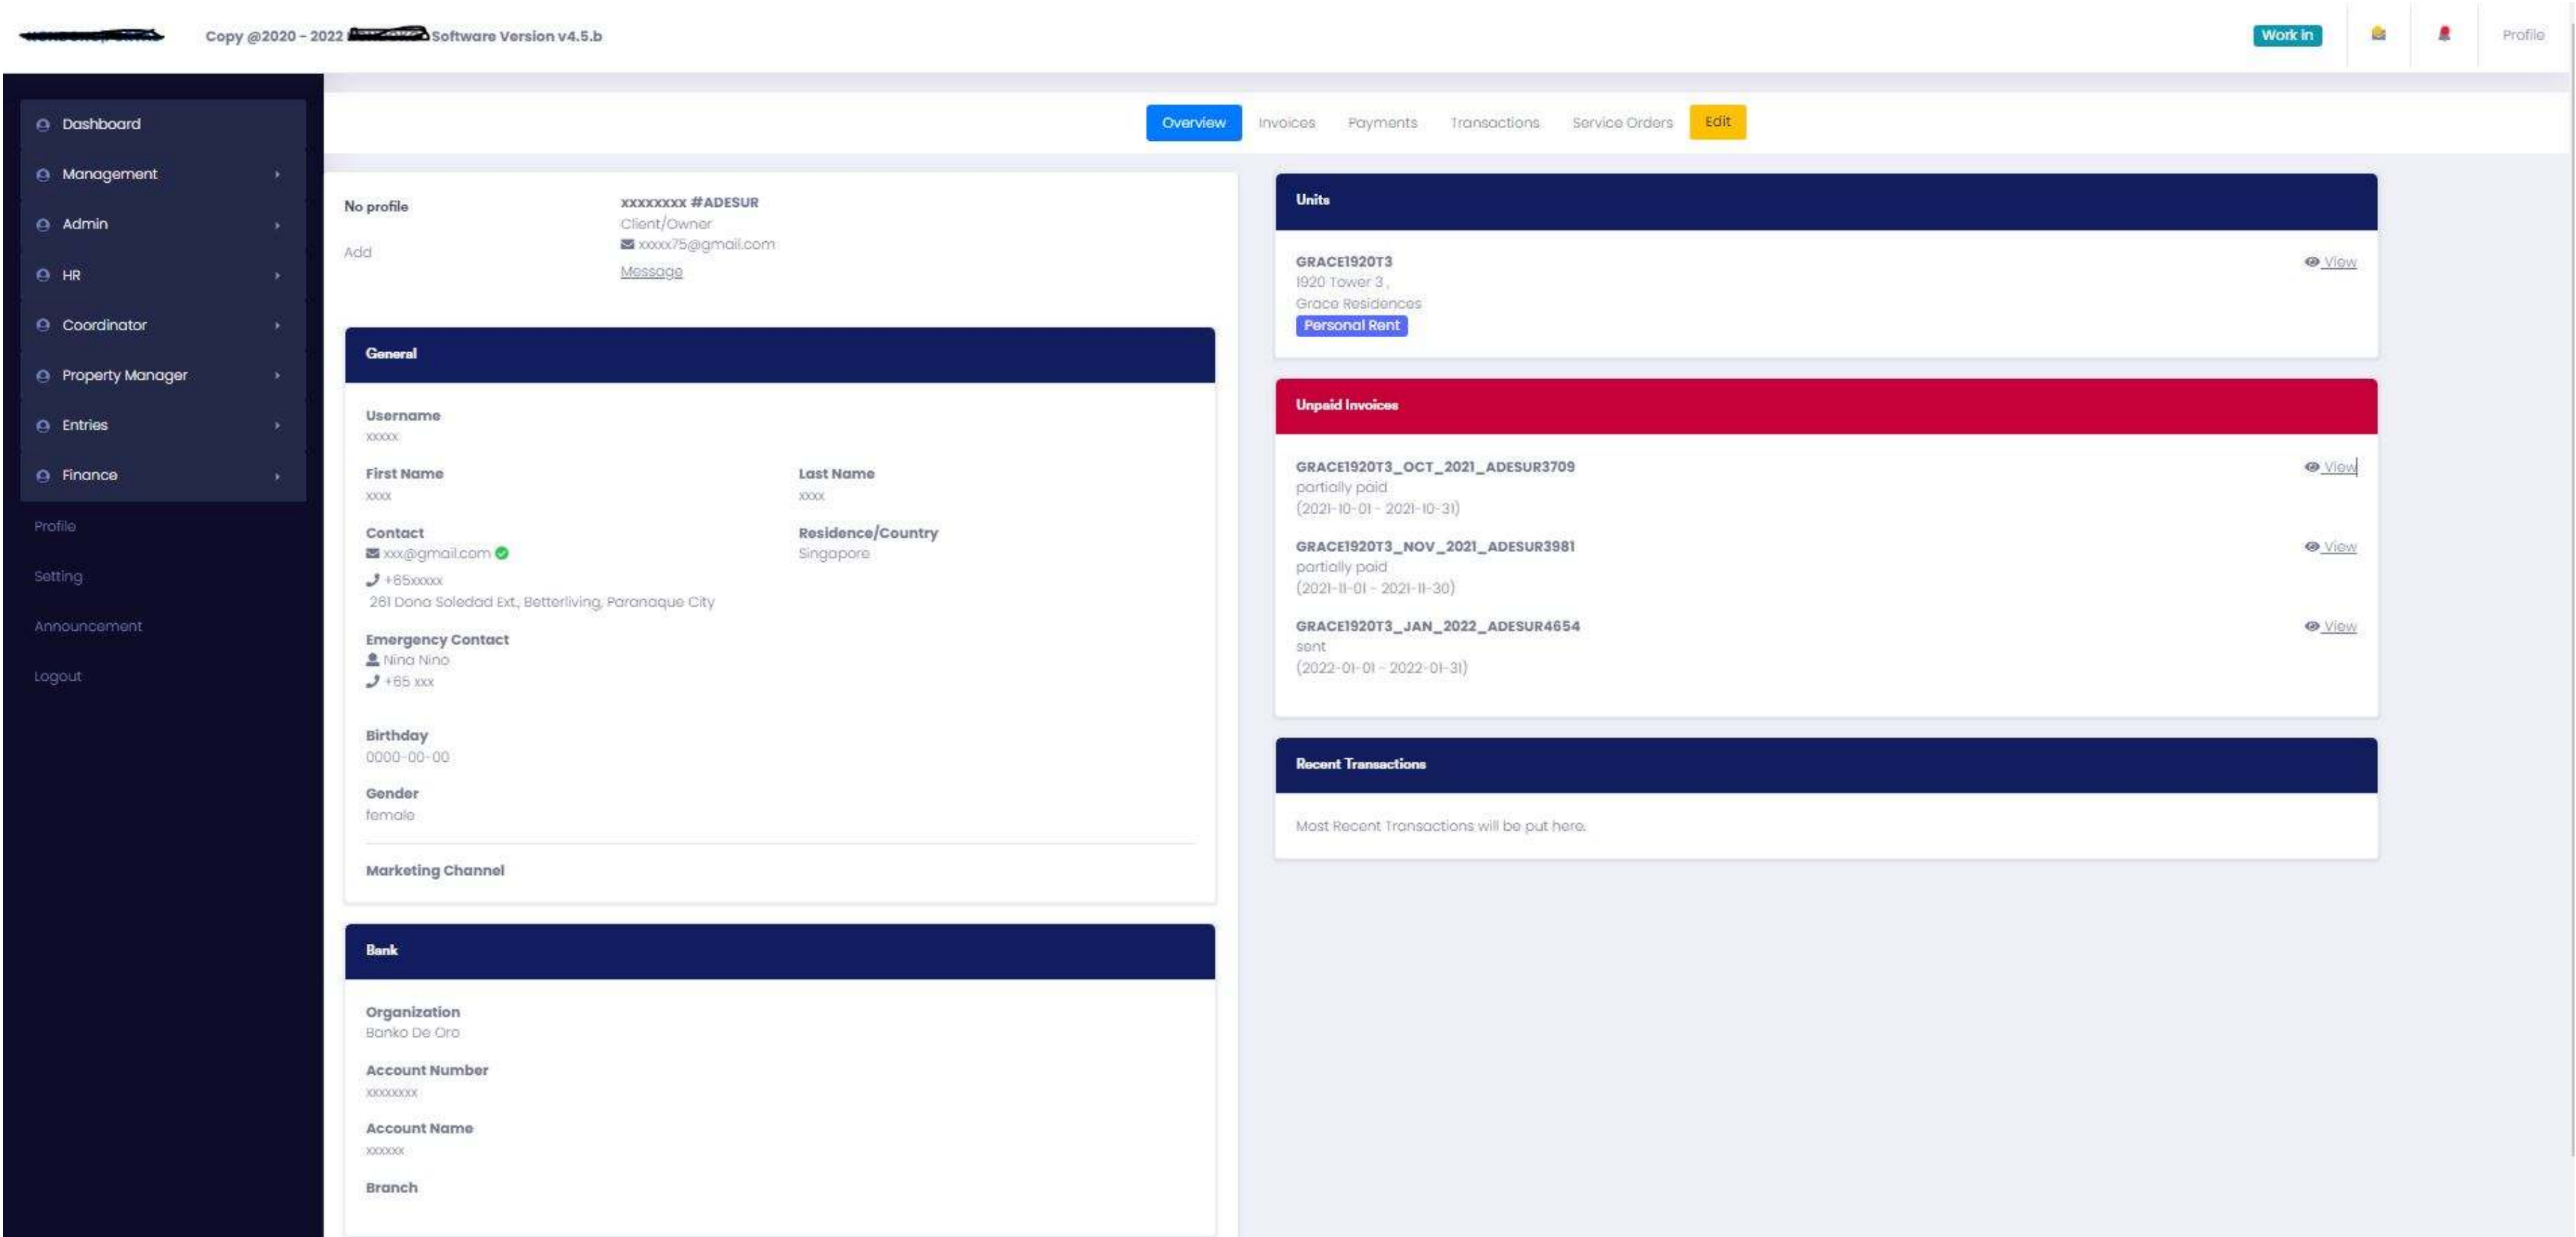

ZEND

PROJECT MANAGEMENT AND BUSINESS ANALYST EXPERIENCE

Most of my software development experience is I directly talk with the people of the company from top guys to operations, talking with them I was able to develop a skill to create sets of questions to identify the painpoints of their company, with my ability to listen and carefully analyze what they are trying to discuss it helps us to dig deeper in their companies issues.

Three of my most successful projects are the software application projects that I took in a position of a project manager to oversee the completion of the project in timely manner and also act as a business analyst to pin-point what solutions to develop first to address their most difficult problem, having this skills I was able to deliver fast and efficient solution with highest impact and value for the customer.
